**Hiring Committee**

XiFin, Inc.

San Diego, CA

**Dear Hiring Committee,**

I am excited to apply for the Data Science Intern position at XiFin, Inc. As a Master's student in Data Science at the University of Colorado Boulder, I am eager to apply my skills in data analysis, machine learning, and predictive modeling to real-world datasets that drive impactful business decisions.

During my internship at CodSoft, I built machine learning models for predictive analytics, performed data wrangling on large datasets, and developed data visualization dashboards using Python (Pandas, Matplotlib, Seaborn) and Power BI. Additionally, my coursework in statistical analysis, AI/ML, and big data technologies has given me a strong foundation in feature engineering, clustering, and classification techniques.

XiFin's commitment to leveraging AI and ML in healthcare analytics aligns perfectly with my passion for using data-driven insights to solve real-world problems. My technical expertise, coupled with my ability to collaborate cross-functionally and communicate complex findings effectively, makes me a strong candidate for this role.

I look forward to the opportunity to contribute to your team and discuss how my analytical and problem-solving skills can support XiFin's mission. Thank you for your time and consideration.

**Best regards,**

**Rohan Jain**
